DFA vs NFA

- **DFA** = Deterministic finite automaton
- **NFA** = non-deterministic finite automaton
- Angelic vs Demonic nondeterminism
 - **Angelic non-determinism** = a kind of non-determinism where non-deterministic choices are made towards the successful execution of the program
 - **Demonic non-determinism** = a kind of non-determinism where non-deterministic choices aren't made
 - * Used by NFA
